

# Comverse Checklist

## GitHub

- The project should be in a separate repository named `comverse` (lowercase)
- Live branch should be `gh-pages` (to allow viewing on GitHub Pages)

## Files

- `index.html` - The homepage
- `style-guide.html` - The style guide
- `css/main.css` - Homepage styles
- `css/style-guide.css` - Only styles for the Style Guide itself (headings, background, etc.)

## Homepage

- Header
  - Clickable logo
  - Sub menu
    - Should be triggered on the item hover (<a> should span the whole item)
    - Should have an image of a border before the image on the right
  - Search Box
    - Should have the proper input type
    - Should have the border image on the right
    - Text should not overflow after the border on the right
    - Text should be vertically centered and the caret should be padded as well
  - Top-right mini-menu
    - Should have a border between items (same image as in the search box)
    - Hover state with underline
- Slides
  - The slides should be a <ul>, where each <li> has the slide background and content wrapper
    - Slides backgrounds should be fixed (don't move when scrolling)
  - Slides bullets
    - Should be outside of the slides <ul>, positioned absolutely
    - Active bullet should be indicated
    - The bullets should be links with proper anchor to the relevant slide
  - The button should look the same (font per the design or live site), with modular classes
  - Boxes
    - should be the same size as the live site + same margin between them
    - The whole box should be clickable + on hover fully opaque

- Should have the same height as the live site
- Solutions Icons
  - Hover state should be triggered when hovering the text as well
  - Should be no gap when moving the hover from icon to icon (contrary to the live site)
  - Button should be per the design/live site, with modular classes
- Solutions For (optional)
- Events
  - Boxes sizes should be per the design or live site
  - The whole box should be clickable + hover state
  - The links below the boxes should have a hover state
  - Section background should be fixed
- Success Stories
  - Boxes
    - All boxes should have even margins
    - Markup should contain both sides
    - Hovering a box should reveal it's hidden side
    - The whole box should be clickable
    - Modular classes should be used
  - Button should be the same as on the slides
  - Should be a clickable "scroll to top" button on the bottom left of the section
- Footer
  - 3 even columns with lists of clickable links (underlined on hover)
  - Copyright line should have a border between items
    - Links should be underlined on hover
  - Latest blog post/press release
    - Should have the same markup as an event box, modifier class for the styling
  - Subscribe
    - Input text should be vertically centered (including the caret)
    - Text should not overflow the Sign Up button
  - Social icons
    - Should be clickable with a hover state
- General
  - Font sizes should match the design/live site
  - Content wrapper width should be 940px
  - Do not hotlink images, copy to the repository
